

Next query from BO

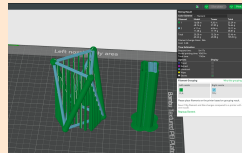

Parametric Design

R , H , twist, d_s , d_t
chosen by the BO loop

CAD Generation

OpenSCAD T3-prism geometry

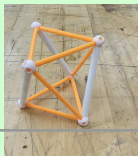

Multi-Material Slicing

PLA + TPU, support generation

Dual-Extrusion FDM

Bambu Lab H2D; TPU drying

Post-Processing & Pretensioning

support removal, tension tuning

Dynamic & Static Testing

quasi-static compression; Lansmont M23 shock/cushion impact

Performance feedback to BO
